Day # 2

NYS Math Exam Practice

LEQ: How can I review division to be successful on the NYS math exam?

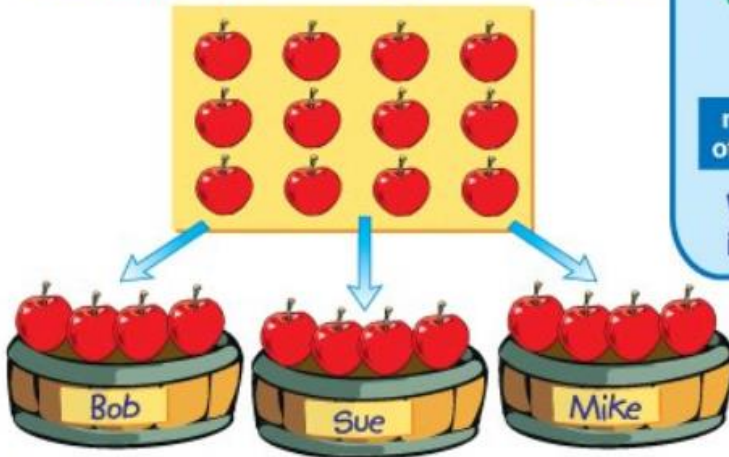

Objective: I can use a set of rules, take great notes, and ask/answer questions to review division and be successful on the NYS math exam.

Division Concepts & Strategies

How Many in Each Group?

Bob, Sue and Mike picked 12 apples to share equally. How many will each get?

Division Sentence

dividend	divisor	quotient
12	3	= 4
↑	↑	↑
number of apples	number of baskets	number of apples in each basket

We use division to find the number in each group.

- 3 equal groups
- 4 in each group

How Many Groups?

We use repeated subtraction to find out how many groups of 4 are in 12.

1. $12 - 4 = 8$

2. $8 - 4 = 4$

3. $4 - 4 = 0$

We subtracted 4 three times. Therefore, there are 3 groups of 4 in 12.

Using Multiplication to Divide

factor	factor	product
3	x 4	= 12
number of equal groups	group size	total number

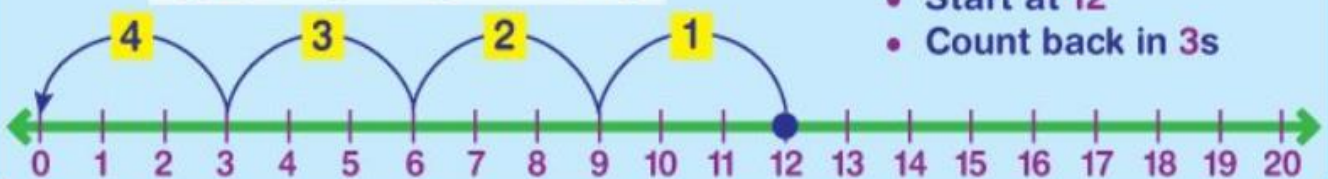

12 red apples are arranged in a 3x4 grid.

dividend	divisor	quotient
12	÷ 3	= 4
total number	number of groups	number in each group

12 red apples are arranged in three rows of four.

Using a Number Line

$$12 \div 3 = 4$$

- Count back to divide
- Start at 12
- Count back in 3s

liquid volume: the amount of space liquid takes up.

The liquid in the container has a volume of 12 L.

We can use liters and milliliters to measure amounts of liquid.

$1,000 \text{ mL} = 1 \text{ L}$

When you think of 1 mL, think of a drop of water.

When you think of 1 L, think of a carton of juice.
