1. Use triangle pattern blocks to cover each shape below. Draw lines to show where the triangles meet. Then, write how many triangle pattern blocks it takes to cover each shape.

Shape A: _____ triangles

Shape B: _____ triangles

2. Use rhombus pattern blocks to cover each shape below. Draw lines to show where the rhombuses meet. Then, write how many rhombus pattern blocks it takes to cover each shape.

Shape A: _____ rhombuses

Shape B: _____ rhombuses

3. Use trapezoid pattern blocks to cover each shape below. Draw lines to show where the trapezoids meet. Then, write how many trapezoid pattern blocks it requires to cover each shape.

Shape A: _____ trapezoids

Shape B: _____ trapezoids

4. How is the number of pattern blocks needed to cover the same shape related to the size of the pattern blocks?

5. Use square pattern blocks to cover the rectangle below. Draw lines to show where the squares meet. Then, write how many square pattern blocks it requires to cover the rectangle.

_____ squares

6. Use trapezoid pattern blocks to cover the rectangle in Problem 5. Can you use trapezoid pattern blocks to measure the area of this rectangle? Explain your answer.

Rectangle B		
Rectangle C		

2. Use all of Paper Strip 2, which you cut into 12 square centimeters, to complete the chart below.

	Drawing	Area
Rectangle A		
Rectangle B		
Rectangle C		

3. Compare the areas of the rectangles you made with Paper Strip 1 and Paper Strip 2. What changed? Why did it change?

4. Maggie uses square units to create these two rectangles. Do the two rectangles have the same area? How do you know?

Shape A

Shape B

5. Count to find the area of the rectangle below. Then, draw a different rectangle that has the same area.

1. Each  is 1 square unit.

Find the area of the rectangle below. Then, draw a different rectangle with the same number of square units.

2. Zach creates a rectangle with an area of 6 square inches. Luke makes a rectangle with an area of 6 square centimeters.

Do the two rectangles have the same area? Why or why not?

A large rectangular area enclosed by a dashed border, containing five horizontal solid lines for writing.

A: _____ square units

B: _____

C: _____

D: _____

2. Each  is 1 square unit. What is the area of each of the following rectangles?

3. a. How would the rectangles in Problem 1 be different if they were composed of square inches?
- b. Select one rectangle from Problem 1 and recreate it on square inch and square centimeter grid paper.
4. Use a separate piece of square centimeter grid paper. Draw four different rectangles that each has an area of 8 square centimeters.

1. Use a ruler to measure the side lengths of the rectangle in centimeters. Mark each centimeter with a point and connect the points to show the square units. Then, count the squares you drew to find the total area.

Total area: _____

2. Use a ruler to measure the side lengths of the rectangle in inches. Mark each inch with a point and connect the points to show the square units. Then, count the squares you drew to find the total area.

Total area: _____

3. Mariana uses square centimeter tiles to find the side lengths of the rectangle below. Label each side length. Then, count the tiles to find the total area.

Total area: _____

4. Each  is 1 square centimeter. Saffron says that the side length of the rectangle below is 4 centimeters. Kevin says the side length is 5 centimeters. Who is correct? Explain how you know.

5. Use both square centimeter and square inch tiles to find the area of the rectangle below. Which works best? Explain why.

6. How does knowing side lengths A and B help you find side lengths C and D on the rectangle below?

2. The area of Benjamin's bedroom floor is shown on the grid to the right. Each \square represents 1 square foot. How many total square feet is Benjamin's floor?

- Label the side lengths.
- Use a straight edge to draw a grid of equal size squares within the rectangle.
- Find the total number of squares.

3. Mrs. Young's art class needs to create a mural that covers exactly 35 square feet. Mrs. Young marks the area for the mural as shown on the grid. Each \square represents 1 square foot. Did she mark the area correctly? Explain your answer.

4. Mrs. Barnes draws a rectangular array. Mila skip-counts by fours and Jorge skip-counts by sixes to find the total number of square units in the array. When they give their answers, Mrs. Barnes says that they are both right.
- Use pictures, numbers, and words to explain how Mila and Jorge can both be right.
 - How many square units might Mrs. Barnes' array have had?

Step 1- Choose the rooms in the house

Below are some ideas for the kinds of rooms you can have in your house. You can make any room you would like. It does not have to be on this list. Be creative! You should have NO MORE THAN 10 rooms.

YOU NEED	Other rooms you <u>may</u> want to include	
Bedrooms	Movie theater	Home gym
Kitchen	Indoor pool	Hair/Makeup Salon
Bathrooms	Trampoline room	Walk in closet
	Bowling alley	Bouncy house room
	Game room	Indoor Basketball Court

Write the rooms in your house

Step 2 Draw your rooms on the grid below.
Make sure you label each room with the name...not the dimensions.
