Name:

Shapes and colors

Most animals pollinate when they look for nectar. Nectar is a liquid found in many flowers. The bright colors and sweet smell of a flower tells pollinators that the flower contains nectar or pollen for them to eat. Flowers that are pollinated at night have very strong scents to make it easier for pollinators to find them.

The luna moth is a beautiful nighttime pollinator.

10

What are three traits of flowers that attract pollinators to them?

Orchids have special markings that guide insects to their nectar.

A paper kite butterfly is pollinating an orchid.

The tail-on-the-finger plant does not smell sweet in fact, it smells like dead meat. This plant attracts flies to pollinate it.

Hummingbirds have long beaks and very long tongues. They are able to feed at flowers that are too deep or thin for other pollinators to reach.

11

Do we need pollinators?

Did you know that more than one-third of the food you

eat depends on pollinators? Pollinators make plants healthier to they can make a lot of food. There are thousands of pollinators. Most vegetables, fruits, and nuts come from plants that were pollinated by insects, birds, bats, and other small animals.

cherries

apples and pears

All these foods!

The foods shown on this

The foods shown on this page, and many more, come from plants that were pollinated by insects and other animals.

blackberries

all kinds of nuts

kiwi fruit

chocolate and hazelnuts

many kinds of vegetables

Why are pollinators important to people?

Pollinators are important to people
because

Grade 2 Module 5 Topic B Quiz

1. Solve the following problems using the vertical method and the place value chart.

a. $380 + 220$

hundreds	tens	ones

b. $277 + 633$

hundreds	tens	ones

c. $243 + 198$

hundreds	tens	ones

d. $358 + 443$

hundreds	tens	ones

2. Solve using the strategy of your choice.

a. $138 + 182$

b. $546 + 198$

c. $424 + 288$

d. $398 + 207$

M5 L 13 Day 1:

Read the word problem

A fruit seller buys 90 apples. He finds that 18 are rotten and throws them out. He sells 22 of the ones that are left on Monday. Now, how many apples does he have left?

Check off each thing as we answer!

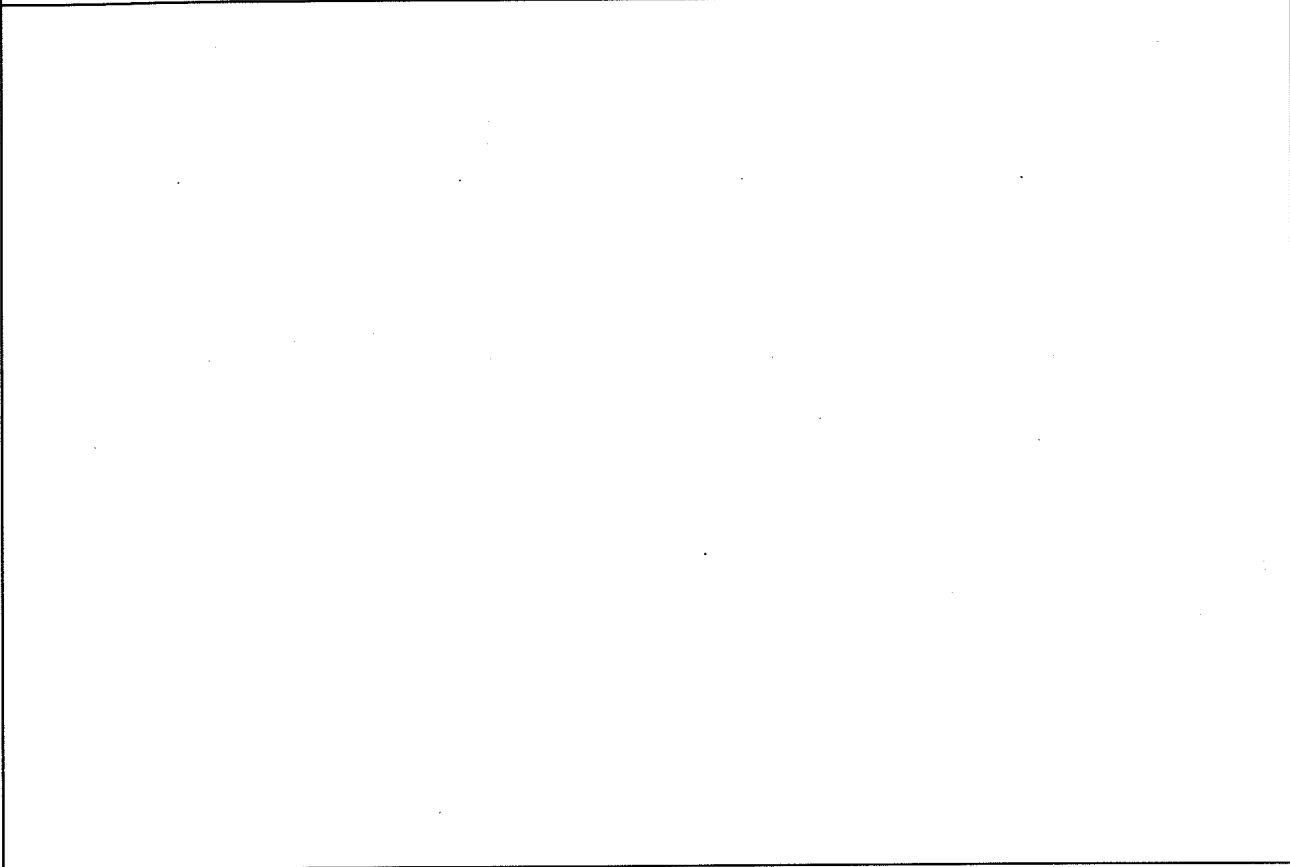

- Read the question
- Re-read the question
-
- Circle the numbers and the units: what are the units we are talking about today? _____
- How many apples to start? _____
- What happened to 18 apples? _____
- What happened to the 22 apples? _____
-
- What is the question underline and then write it?

Bees are pollinators that help plants grow and survive

Matching Details

Other Details

--	--

yellow and black

long tongues

hairy bodies

carry pollen from
flower to flower

collect nectar
and pollen to eat

make honey

some people are
allergic to bees

live in hives

some nest
underground

over 250 types of
bees

pollinate many
fruit and
vegetable plants

Some bees have
stingers.

Scientific Drawing of a Bee: Shape

Directions:

- Create a sketch of your second bee photo.
- Remember to observe closely before you begin drawing.
- Focus specifically on this bee's shape and size.

Based on your research today, write one sentence about how bees help plants grow and survive:

rain	pail	mail
main	plan	chain
pan	pain	tan
rail	ran	train
man	brain	tail

Name _____

-an	
-ail	
-ain

Pollination: Bees

Lesson 16

Objective: Subtract from multiples of 100 and from numbers with zero in the tens place.

$6 + 10 = \square$ $3 - 2 = \square$ $13 - 12 = \square$ $9 + 6 = \square$ $13 + 10 = \square$

$17 - 3 = \square$ $15 + 2 = \square$ $7 + 8 = \square$ $19 - 10 = \square$ $5 - 1 = \square$

$12 + 2 = \square$ $2 + 14 = \square$ $19 + 2 = \square$ $13 + 12 = \square$ $17 - 12 = \square$

$7 + 8 = \square$ $17 - 5 = \square$ $11 + 5 = \square$ $16 - 8 = \square$ $4 + 9 = \square$

$6 - 5 = \square$ $15 - 15 = \square$ $13 + 13 = \square$ $16 - 0 = \square$ $2 + 4 = \square$

$18 - 4 = \square$ $10 + 9 = \square$ $10 - 7 = \square$ $3 + 12 = \square$ $13 + 19 = \square$

$15 - 13 = \square$ $17 - 0 = \square$ $8 + 1 = \square$ $11 + 2 = \square$ $16 - 4 = \square$

$17 - 2 = \square$ $15 - 11 = \square$ $16 - 7 = \square$ $13 - 6 = \square$ $7 + 8 = \square$

M5 L 13 Day 5:

Read the word problem

The cafeteria has 80 pears. They see that 19 are rotten and throws them out. They give Barnard 23 of the ones that are left on Monday. Now, how many pears does he have left?

Check off each thing as we answer!

- Read the question
- Re-read the question

- Circle the numbers and the units: what are the units we are talking about today? _____
- How many pears to start? _____
- What happened to 19 pears? Are we + or -
- What happened to the 23 pears? Are we + or -

- What is the question? Underline it.
- Today let's solve it!

Name _____

Date _____

1. Solve vertically or using mental math. Draw chips on the place value chart and unbundle, if needed.

a. $304 - 53 =$ _____

hundreds	tens	ones

b. $406 - 187 =$ _____

hundreds	tens	ones

c. $501 - 316 =$ _____

hundreds	tens	ones

Hermit Crab

Hermit crabs are crustaceans that must live in a shell for protection. They have soft abdomens that the shells protect. They also use their shells to store water to keep their gills moist so they can breathe.

Hermit crabs make good pets that can live from 5 to 15 years. They are nocturnal, which means they move around a lot at night. They are also very social and like

to live in groups.

1. Remembering: Main Idea

Who? _____ → _____
What? _____ → _____
Why? _____ → _____

2. Understanding: Details

Write 3 sentences about what you remember or learned.

3. Applying

Why is it important for the hermit crab to live in a shell?

4. Analyzing

What are some parts of a hermit crab?

5. Evaluating

If it was daytime and the hermit crab was alone, what do you think you would see?

6. Creating

What is the most important reason that the hermit crab keeps its gills moist?

7. Your Opinion

What was the most interesting fact you learned about a hermit crab?
