End of Mystery Assessment

1. Why do flowers grow fruit?
 - a. Flowers don't grow fruit.
 - b. Flowers grow fruit to house their seeds.
 - c. Flowers grow fruit so that animals will eat the seeds and move them around.
 - d. Flowers grow fruit for farmers to pick them.

2. What part of an apple reminds you that it was once a flower?
 - a. The seeds inside the apple and the bottom of the apple.
 - b. The skin of the apple and its color.
 - c. The stem on the apple.
 - d. An apple has always been an apple.

3. How could you tell if something is a "science fruit?"
 - a. Science fruit is also regular fruit.
 - b. If it has seeds, then it's a fruit.
 - c. If it has a skin, then it's a fruit.
 - d. There is no such thing as a science fruit.

4. What is an example of a “science fruit” that is normally called a vegetable in the grocery store? Why do you think it’s called a vegetable in the grocery store?

I think that a “science fruit” is called a vegetable in a store because

Scholars, today I will be introducing the next mystery.
