## Area Review

## Area Formula

## Input Activity

## Problem 1

Margo is designing a label. The dimensions of the label are $3 \frac{1}{2}$ inches by $1 \frac{1}{4}$ inches. What is the area of that label?

Step 1: With your ruler, draw a rectangle that has a length of $3 \frac{1}{2}$ and a width of $1 \frac{1}{4}$.

Step 2: Label the length and width.
Step 3: Use the area formula (length $x$ width) to find the area of the rectangle.

- Change the mixed numbers to improper fractions
- Multiply numerators first, then denominators second
- Reduce when necessary.

Measure each rectangle to the nearest $\frac{1}{4}$ inch with your ruler, and label the dimensions. Use the area model to find each area.
